He has a lot of background in math + knows what he's doing, just sometimes I got confused due to the content of the course. Sometimes he taught the ~~the~~ lecture in terms I didn't know, but

VERY GOOD AT EXPLAINING EQUATIONS EFFECTIVELY. AT FIRST IT WAS DIFFICULT BECAUSE OF THE DIFFERENT WORDS HE USED & THE DIFFERENT WAY HE EXPLAINED THINGS FELT UNORTHODOX. IN THE END, HE IS A VERY EFFECTIVE MATH PROFESSOR COMPARED TO MY PROFESSOR THAT I TOOK THE 1ST TIME.

Strength- very intelligent.
seemed to know what you
were doing
but....

Weakness - I couldn't "catch on" to the
material the way you explained it.

Teacher was always prepared for class, and was able to motivate students in the subject matter. However, more time needs to be spent on the more complex theoretical stuffs. ~~Not~~ I enjoyed Prof. Ross as my Calculus ^{prof}, and would recommend him. Further, I think more examples should be worked out.

Strengths - very well prepared and shows a lot of work problems things we need to know. Makes math very interesting and little more understanding for me. Very well organized and helpful to make me understand more of the difficult problems.

Weaknesses - Do more problems and not finishing off the answers

Please comment below on special strengths and weaknesses of the instructor and the instructor's conduct of the course. Constructive criticism is solicited.

Strengths:

- knowledge in subject
- answers questions readily
- does all examples that are asked of him

Weaknesses:

- too fast explanations
- need more office hours
- plan his teaching methods

I liked that Prof. Ross always took time out to do examples and to go over homework problems. It really helped me a lot to understand the section better. He was always prepared for class and very prompt in returning all quizzes. The work given was sufficient and was challenging. Grading was fair and consistent. He was also available for help at anytime. If I had a choice, I would choose this instructor again.

Homework assignments and quizzes were reasonable. The instructor was well prepared for class and he got the ideas across pretty well. Going over the homework was helpful

Mr. Ross explains the problems thoroughly. He tries to go over every specific example, time permitting. Although I think it would further benefit the entire class if he increased his office. Too often students are unable to consult him with any questions.

Good lectures. Tests are difficult but he compensates for the low average. Sometimes lectures are boring.

Prof. Ross provided excellent examples and made time to answer our questions on homework and quizzes. However, he sometimes assumes that we can skip steps that only he himself considers simple.

Strengths:

gave many examples and going over homework was very helpful. Taking the time to answer questions on some problems made it easier to understand the problem.

Weakness:

going over material too fast.
Other than that, I thought that his explanation of everything was pretty straight forward.

Strengths - Grades fairly, but doesn't work
out problems to the fullest, sometimes
- has an open attitude toward student
questions

Weaknesses - Makes tests too long & hard!

STRENGTHS - EXPLAINED PROBLEMS WELL + WENT OVER HOMEWORK
PROBLEMS IN CLASS
- WEEKLY QUIZZES WERE REASONABLE BECAUSE IT
DEALT W/ THE MATERIAL + HOMEWORK WOULD
BEEN COVERING

WEAKNESSES - MIDTERMS WERE SOMEWHAT DIFFICULT + LENGTHY,
FOR SOME TESTS THERE WASN'T ENOUGH TIME
TO FINISH

Overall I think he was a pretty good teacher.

Strengths ~ explanations of things (sometimes I feel like he goes a little too fast leaving

everybody left with "huh" on their minds)

Weaknesses ~ only weakness I can think

of ~ returning things especially quizzes promptly

I understand that he has other classes and stuff ~ but we students do our HW for each class daily and it's kinda not fair to wait 2-3 days to get a quiz that we took on Monday back.

ROSS is a very detailed teacher. He goes through the material thoroughly, and stops to explain whenever there are questions. An excellent teacher.

(Certain sections went by fast, but only because there is so much material to cover).
