Define the following terms and give an example.

1. coding

2. bitstring

3. a $(5, 3)$ linear block code

4. information bits

5. parity check bits

6. the equations for a linear code

7. codeword

8. syndrome

9. error detection

10. error correction

11. Hamming weight

12. Hamming distance

13. minimum distance of a code
