Succeeding in Calculus II

Many students find calculus to be very challenging and need extra help. The Mathematics Department would like to provide the extra help. We are offering a program which is modeled after programs that have been used with great success in some of our peer institutions on the Mainland.

A section of Supplemental Instruction (SI) in Calculus II will be offered in the Spring. SI is a course which meets for two hours each week. This course is open to students who are concurrently enrolled in Math 242.

For the first few weeks, SI will review material pre-requisite to Calculus II — material that is crucial for your success. As need arises, SI may return to such topics at any time during the semester. After the review, SI will follow the Math 242 material closely, and students will work on problems similar to, but not the same as, those used in Math 242.

Once you commit to coming to Math 242 SI, you are expected to attend every class meeting. The SI instructor will take attendance and follow up with all students who miss a meeting.

What makes this course even better is that it is free. To sign up for this course, all you need to do is show up the first day of class and sign in.

Math 242 SI
MW, 2:30-3:20pm, Keller 404
