Ross was an excellent teacher. He is very knowledgeable in math. His lectures were well prepared and he utilized his time very effectively and efficiently. I would rather have him as my teacher than any other math teacher at UH. I mean it !!! I failed this calls twice, because the teachers before did not get the message across, but Ross did. Thank you Mr. Ross.

Instructor seems to be active, willing to get advice from students, although sometimes he will lecture us on math history. That was somewhat interesting. Examples were given out in class. His grading were okay. There isn't any other thing that I can say about him. If I were to give him a grade for his teaching ability, I would give him a B+.

- KNOW MATERIAL BUT OFTEN HURRIED IN SHOWING EXAMPLES & EXPLAINING IT.
- DIDN'T MAKE MUCH USE CONTACT W/ STUDENTS

I thought this class was relatively good. The subject was difficult and the book was not helpful in finding out how to do the problems. He was willing to do the problems we asked, which was very helpful. His grading is also pretty fair.

Presented material at a manageable pace and in a way that was easily understood. Tests were always returned promptly.

Prof. Ross could explain the material good. I mean I understand him. Plus, he also gives other ways to solve a problem, if there is another solution. Since I repeated this course, I understand him more than the previous instructor. 

Sometimes he moved too fast, but all in all, I really learned from his class. I got a better understanding.

STRENGTHS

- Reviews in depth on problems with homework, tests, and quizzes
- Goes over any questions that we have
- Open to discussion outside of class

WEAKNESS

- Goes over problems without following problem all the way through.

have been assigned.  You are not expected to sign this form.
I think that Professor Ross is well prepared in class and gives a good explanation on the course material. He goes over many examples in class and has party the class period to go over homework problems. The only thing that I would change about the class is the number of quizzes we have. I think that it would be better if there were fewer quizzes so people would have a longer period of time to digest the material.
Professor Ross really knows his course well. I know he's a busy person juggling work and family life, but unfortunately it seems he has no time. His office hours were scheduled for Mondays at 10:30 - 12:30(?), but the problem was that Mondays were really tough for me to be there. In casual talk after class, it seemed as if he was rushing the conversation trying to escape my questions. I understand that Professor Ross is very busy, but he shouldn't subtract us out of the picture just because the time isn't scheduled.

Thank You.

The instructor was knowledgeable of the subject material, but his "math lingo" was lost on me in class. Grading was more than fair, and the assignments were beneficial.

Please comment below on special strengths and weaknesses of the instructor and the instructor's conduct of the course. Constructive criticism is solicited.

Strengths: Ross goes over problems from homework and quizzes and exams, which really helps to know how to solve problems.

Weaknesses: Sometimes he rushes through the problems and is too fast to follow. Sometimes, he doesn't finish the problem and says "etc." because we should know how to do the next. Sometimes he is unclear in explaining subject matter in the lectures.

Please comment below on special strengths and weaknesses of the instructor and the
instructor's conduct of the course. Constructive criticism is solicited.

Weakness: going too fast during lectures
- not enough time for students
to write down notes
- too difficult to understand all that is said
- all at once

Strengths: easy to talk to one on one
- grading policy is really fair

I found the material easier to understand when he answered all problems that we had questions on. Overall he is a great instructor as well as fair!

*Completed questionnaires will be given to your instructor after final grades for the course have been assigned. You are not expected to sign this form.
The instructor was not monotonous, gave history of math here and there to interest the class, was good enough to be able to laugh if he made an error, went through the thought process involved in the math rather than just blindly following his notes, gave quizzes regularly, and also had extra credit points possible on the exams. All of this, I think, was good. Also good — he gave a lot of assignments and his grading of quizzes and exams was not harsh.

Please comment below on special strengths and weaknesses of the instructor and the instructor's conduct of the course. Constructive criticism is solicited.

Strong Points:
1) Ross's grading is very fair.
2) He reviews homework, quizzes, and test problems frequently.
3) Listens to concerns of students.

Weak Points:
1) He explains concepts/theories too quickly. Students are not able to follow what he says in class.
2) He needs to explain concepts more clearly. Sometimes he talks so vaguely, using some advanced terms that I found confusing.

Please comment below on special strengths and weaknesses of the instructor and the instructor's conduct of the course. Constructive criticism is solicited.

Strength — intelligent, speak eloquently in mathematical language, 

Weakness — not so prepared for lectures & answering H.W. problems; not so organized; do not really explain abstract subjects in concrete examples.
