Course and Section no. Math 206

Please comment below on special strengths and weaknesses of the instructor and the instructor's conduct of the course. Constructive criticism is solicited.

First of all I think the book is awful. The answers in the back are absolutely useless because they are often simply numbers or expressions which shed no light on where one has gone wrong in the problem. Perhaps if the solution manual were in the bookstore it would be ok. I've also found sometimes there are problems which the techniques for solving them are not introduced until the next chapter.

As far as Professor Ross's teaching is concerned, the only real complaint I have is not having enough time of the tests and quizzes. Rather than, as intended, giving people a chance to do a little extra, I think it forces us to work too

Instructor Ross

Course and Section no. math 204, section 3

Please comment below on special strengths and weaknesses of the instructor and the instructor's conduct of the course. Constructive criticism is solicited.

the book is hard to read and understand

the math lab takes up too much time and is more
useful than helpful

Instructor Prof. Ross

Course and Section no. Math 206-3

Please comment below on special strengths and weaknesses of the instructor and the instructor's conduct of the course. Constructive criticism is solicited.

The instructor understood the material well. The pace of the class is too accelerated and difficult to understand. The instructor was very enthusiastic about the math problems.

I think Prof Ross is a pretty good instructor. However, he does good a bit fast once in a while. Like many others, I think the textbook that we are using is not very useful. Explanations are hard to follow and examples are inadequate.

Instructor Ross

Course and Section no. Math 206, Section 3

Please comment below on special strengths and weaknesses of the instructor and the instructor's conduct of the course. Constructive criticism is solicited.

- Instructor is very knowledgeable on subject.
- Is willing to ~~help~~ make time for extra help.
- grading is fair, grading ~~process~~ process is very ^{helpful} encouraging. (low score dropping, etc)

*Completed questionnaires will be given to your instructor after final grades for the course have been assigned. You are not expected to sign this form.

I would have liked the book better if the examples showed every single step that pertained to Calculus, meaning in the higher chapter tell you if they used a derivative because sometimes I became confused, also if the book included some software to aid on doing the homework or a home page for help. ☹

This course has excellent structure to it,
IT was easier to learn in this class because
text problems were all open to being explained.
Also the weekly quizzes ensure that we keep
up to date on course material.

As for an alternate text, I suggest "Finney's Calculus"
written by 2 professors at MIT.
I took Math 205 ~5 years ago and so I spent the
summer reviewing for this course.
After doing an exhaustive search on the web, this was the
best recommended one I could find.
It is clearly and completely written.
My opinion is that it is a superior text to Salas + Hill.
