*Student Evaluation of Teaching**

Instructor D. ROSS

Course and Section no. MATH 241 - 004 - 005

TEACHING EVALUATIONS*:

Please return all forms to the Math Dept. in Keller 419.
If the Office is closed, please go to Keller 401A for assistance.

*Completed questionnaires will be given to your instructor after final grades for the course have been assigned. You are not expected to sign this form.

Instructor David Ross

Course and section no. Math 241

Please comment below on special strengths and weaknesses of the instructor and the instructor's conduct of the course. Feedback regarding the second half of the semester is of particular interest. Constructive criticism is solicited.

Professor Ross' course was informative and intriguing. He covered all of the topics that were expected to be learned in calculus I. I enjoyed learning about theories and proofs in this class. Professor Ross definitely has a lot of knowledge and insight about mathematics and it reflects in his teaching style. I believe he is well qualified to teach this class and other classes like it. I would recommend Professor Ross to other students, especially if they want a deeper understanding of calculus concepts.

Please comment below on special strengths and weaknesses of the instructor and the instructor's conduct of the course. Feedback regarding the second half of the semester is of particular interest. Constructive criticism is solicited.

Prof. David Ross has a lot of knowledge that he sometimes takes for granted. That is, sometimes he burns through the lecture/problem and simple people (like me) can lose him. That said, if I read the book and prepared in advance I'm sure it wouldn't be so bad. He's a good guy and a solid teacher IMHO, so I can't blame him for losing me in a 50 minute lecture.

Rumors that Prof. Ross is a tough teacher seem to stem from his interest in proofs. His quizzes are fair, as they covered our assigned homework. That little burst of anxiety has definitely kept me on track. He and his TA's office hours also helped me. My only real complaint are the questions done in class that end up being wrong, complex, or both.

Overall, he's a good teacher who matches my sense of duty. This inspired me to try more math classes and hope to keep that feeling for future classes.

Strengths - ~~None~~ ~~He is a nice character~~
~~His character is what I like~~

Weaknesses - Teaching is very unorganized
Hard to understand
Often makes mistakes

Instructor Dr. David Ross

Course and section no. 241 + 9:30

Please comment below on special strengths and weaknesses of the instructor and the instructor's conduct of the course. Feedback regarding the second half of the semester is of particular interest. Constructive criticism is solicited.

Interested and focused for the first half of the semester. Good Quizzes and good review problems for the exams. Interest and focus started to wane after 2nd Exam. Sometimes lectures can feel a little long and tedious. Sometimes I have difficulty following along with problems and don't understand all the steps. Good amount of homework and fair Grading. 2nd half of semester seemed more tedious than first half.

*Completed questionnaires will be given to your instructors after final grades for the course have been assigned. You are not expected to sign this form.

Instructor David Ross

Course and section no. Math 241 Section 4

Please comment below on special strengths and weaknesses of the instructor and the instructor's conduct of the course. Feedback regarding the second half of the semester is of particular interest. Constructive criticism is solicited.

Weaknesses:

- Sometimes assumed that students already "knew" the math concepts confidently.
- ~~Some~~ Examples only involved variables and not real #'s or values so you felt ill-prepared for the hw.
- Sometimes the book was a better teacher. Things were not explained clearly.
- The second exam wasn't fully representative of the hw.

Strengths:

- Had the enthusiasm and interest in math which was necessary.
- Although some lessons weren't taught the best, he did teach well by using mult. examples and trying to teach using other methods.

*Completed questionnaires will be given to your instructors after final grades for the course have been assigned. You are not expected to sign this form.

He's a decent teacher but I think w/ some improvement we could be a great teacher.

Please comment below on special strengths and weaknesses of the instructor and the instructor's conduct of the course. Feedback regarding the second half of the semester is of particular interest. Constructive criticism is solicited.

Dr. Ross is a very reasonable professor. What I like about him is that he gives very reasonable quizzes and has appropriate expectations for our class, which I appreciate a lot. He obviously puts a lot of his time into making sure we succeed; it's up to the students to take advantage of what he's given us. Some things he could work on are the accuracy of his examples; he often makes a lot of mistakes while teaching. His teaching style isn't what ultimately is the best, but I would take a course from him again because he is a very understanding professor.

He also makes funny jokes.

The teacher has a large pool of information regarding the subject material. First time someone taught me a method formulated before the current method we use today made by highly intelligent people, I feel that there is a slight disconnect between the course material and what is in the text book for the explanation. What to cover material is more in depth from a wider perspective than covered inside the text book. Rough is what I would like to personally call this class but it does challenge us for a higher level of thinking.

Please comment below on special strengths and weaknesses of the instructor and the instructor's conduct of the course. Feedback regarding the second half of the semester is of particular interest. Constructive criticism is solicited.

Dr. Ross had extensive knowledge about math, but I wish that he could relate it back down to the student level more clearly. The lectures were generally pretty difficult for me to follow, so I ended up learning everything on my own through the textbook.

I really appreciated the homework & quizzes that Dr. Ross assigned because they helped keep me on track for this semester. He was also very generous about grading, which I also appreciated.

Please comment below on special strengths and weaknesses of the instructor and the instructor's conduct of the course. Feedback regarding the second half of the semester is of particular interest. Constructive criticism is solicited.

I can tell he is very smart in the field. He will ask if there are any questions which is good, but he cannot tell when the class doesn't get it during lecture, and this hurts when taking the exam. I won't blame him though because there are times nobody asks any questions.

I recommend having the homework be GRADED so students have incentives to do it, and will have questions during class, and to help those who are just terrible at taking tests.

Instructor David Ross

Course and section no. 004 Math 241

Please comment below on special strengths and weaknesses of the instructor and the instructor's conduct of the course. Feedback regarding the second half of the semester is of particular interest. Constructive criticism is solicited.

Pros

- VERY passionate about calculus and the history / understanding why things in calc are the way they are
- Always shows proof's and plenty of extra credit
- Always gives time to ask questions about hw or previous quizzes

Cons

- More time to work on quizzes in class

*Completed questionnaires will be given to your instructors after final grades for the course have been assigned. You are not expected to sign this form.

Course and section no. _____

Please comment below on special strengths and weaknesses of the instructor and the instructor's conduct of the course. Feedback regarding the second half of the semester is of particular interest. Constructive criticism is solicited.

I really enjoyed the class, especially some of the kind of side tangents like working to figure out pollutants as corporations changed shapes or run off ditches.

Another thing I liked was multiple exams. It's stressful when a huge chunk is one midterm and the other is the final. Having 3 exams helped w/ this.

I think there was a bit too much emphasis on proofs when just extra regular problems would have been more useful.

*Completed questionnaires will be given to your instructors after final grades for the course have been assigned. You are not expected to sign this form.

Course and section no. CALC 241

Please comment below on special strengths and weaknesses of the instructor and the instructor's conduct of the course. Feedback regarding the second half of the semester is of particular interest. Constructive criticism is solicited.

Overall, Ross is a good professor. I do wish however that he provided more examples in his lectures that had less to do about theory and more on how to solve the problems we are being tested on. Also, his grading system seems a bit subjective in my opinion. Despite these things, I appreciated the genuine care and concern he exhibited for his students.

Instructor Dr. ROSS ~~Ward~~

Course and section no. Math 241 - 005

Please comment below on special strengths and weaknesses of the instructor and the instructor's conduct of the course. Feedback regarding the second half of the semester is of particular interest. Constructive criticism is solicited.

Strengths: NO SURPRISES ON EXAMS

allows for a crib sheet on exams (except finals)

goes over theories and does examples

Weaknesses: Can go off on tangents, sometimes

~~leave~~

Prof. Ross did well to explain concepts ~~well~~ⁱⁿ concise detail. What truly helps in the course is his ability to guide the class through a problem and making easy to understand. Overall good teacher, but sometimes has a fast pace through lecture

Please comment below on special strengths and weaknesses of the instructor and the instructor's conduct of the course. Feedback regarding the second half of the semester is of particular interest. Constructive criticism is solicited.

I enjoyed how he was able to connect things that we talked about in the past - in regards to math - and prove it with higher math. Sometimes it does feel like the material he goes through gets too conceptual so it's hard to keep up.

Strengths

- knows what he's talking about
- really informative
- replies to his emails on a Timely Manner

Weakness

- Scatterbrained he skips over a lot of stuff
- wasn't helpful in explaining how to do problems, felt like a machine

*Completed questionnaires will be given to your instructors after final grades for the course have been assigned. You are not expected to sign this form.
