Prof. Ross taught this class with enthusiasm & a genuine sense of caring for his students. He made the time to answer our questions to the best of his abilities. One thing that I did like about him was his sense of humor & how he understood that we all don't love only mathematics.

One suggestion would be to slow down the pace a little, but I understood that there is a lot of material that need to be covered.

Grading was fair & he made class enjoyable rather than boring.

Thanks Mr. Ross, I enjoyed the class & maybe we'll run into each other in another math class.

I thought a lot of the material was valuable. Although connections with our everyday life ~~were~~ would have made the class more interesting and kept us into the lessons. It seemed we covered a lot of material in such little time. Is it necessary to go through so much in this limited time? Overall I enjoyed the class and got a lot out of it!!

Dr Ross seemed to know the material ~~and~~ and presented the material in a manner in which I could understand. He also made me feel that if I had a question that I could either ask in class or during office hours. At times it seemed as if we were learning the same material for days and days.

AN INTERESTING COURSE. MAYBE SLOWING DOWN  
OCCASSIONALLY AND EXPLAINING THE STEPS INVOLVED IN  
SOME OF THE THEORITICAL DERIVATIONS DONE IN  
CLASS. A FAIR GRADER AND GIVES ADEQUATE HOMEWORK  
ASSIGNMENTS

Prof is very knowledgeable and very enthusiastic —  
I got pretty into it. The text was good — not too  
hard. Prof Ross covers a lot of material and sometimes  
I think you go a little too fast (your brain works  
too fast, faster than ~~ours~~ do sometimes...) so we get a  
bit confused (in)

I'm glad you put a lot of extra points on exams  
because we need them! Some exams (especially Midterm 3)  
was too long — it wasn't hard, we just ran out of  
time.

Suggestions: I guess my only real suggestion is that you  
make your exams doable in the time allowed and slow  
down in your lectures (it's non-stop writing for the students).

The class was enjoyable — I think you are very  
smart, but remember that not all your students pick  
things up as quickly as you do (in)

He is very helpfull and nice!

Sometimes the lecture is complicated and more difficult than materials on text book.

- 1) ~~he~~ I like the way he explains each method carefully and he takes the time to explain our questions so we understand what's going on
- 2) tests are generally rigorous enough but I always feel rushed. maybe if the test went so long I would feel much more comfortable
- 3) sometimes, he mumbles so I have a hard time
- 4) I like the fact that he makes himself available and he doesn't act like some other professor like we are so dumb and stuffs.

- PRO: - THOROUGHLY EXHAUSTIVE ANALYSIS OF STATISTICAL THEORY  
- AFFABLE, APPROACHABLE, A DEFINITE ASSET  
- PREPARED, CONCISE; HWK WAS GRADED VERY QUICKLY.  
- COMMUNICATED WELL AT A VERY MODERATE PACE.

- CON: COURSE CONTAINED TOO MUCH, SOME IMPORTANT  
STATISTICAL THEORIES WERE COVERED IN TOO SHORT A TIME

Lectures were planned well. But the tests were too long esp. the last exam. The cheat sheets were very helpful. Returning homework quicker would make it more meaningful.

This course was harder than I thought it would be. I thought it would be more computational than theoretical. I think that I learned a lot in this class.

Dr. Ross really knows his stuff. He can explain things well. Sometimes he moved a little too fast. I had a hard time keeping up when taking notes. The only thing I can think of is I wish that he would return our tests and homeworks right away. Overall, he's a good teacher!

He is a pretty good lecturer, and is willing to answer any questions during class and outside of class. He added some extra things to the book, which was nice. He explains things well and is usually prepared for class. Overall he did a good job this semester. Only thing I didn't like about his class was that he was sometimes deceiving.

The instructor shows a lot of enthusiasm for the subject + tries to make the class interesting. He makes good use of examples. He is very fair in his grading. He needs to return homework + exams in a more timely manner.

It really helps with the examples of the problems and helping with homework. The exams can get to be long so you don't have the time to finish the questions to the best of our ability. The homework seemed alot more easier and self explaining than the exam questions, where the homework should prepare us better for the exam questions.

strengths: Fair, giving homework, helpful, knowledgeable

weakness: lots of times not prepared for class, and  
Midterms may tend to be a little long to finish in a 50 minute  
class period
