MATH 432

1

Please comment below on special strengths and weaknesses of the instructor and the instructor's conduct of the course. Constructive criticism is solicited.

- Good online notes
- Ch 12 homework was hard to do
- because the track was different
- More class participation every help.

*Completed questionnaires will be given to your instructor after final grades for the course have been assigned. You are not expected to sign this form.

Strengths: Dr. Ross comes to class prepared, ready to teach. Teaches in depth. A good, solid teacher.
Weaknesses: Maybe slow down a little so we can digest what he is saying. Just pour a little.

Lectures are always very well prepared. He plans exactly why he needs certain things or statements and in what order.

This could also be a weakness, the class went at a slightly slower pace because of some of the detail that was put into certain topics, which isn't actually that big of a weakness.

I enjoyed the treatment of Stone-Weierstrass, especially the detail that went into proving it under certain conditions and then weakening those conditions. It was really cool seeing the insight on going from having nothing to having assumptions and a theorem.

Overall I really enjoyed this and Math 431 and I regret not being able to take Math 631 next semester.

Great teacher. Lectures are well thought out. Very well organized and knowledgeable in the subject. No complaints. Maybe HW should be returned ~~more~~ earlier.

Very helpful during office hours.
and helpful
Give clear examples during class.

Gives other methods of proofs, that
differ from the book, which is very helpful!
