Syllabus for Math 241 Recitation Fall 2016

Discussion Section: F 9:30 - 10:20, Keller 401
TA: Mindy Case
Email: mindyc8@math.hawaii.edu
Office: Keller 312
Office hours (tentative): MW 12:30-1:30, F 10:30-11:30

Daily Agenda: We’ll begin each class with any questions, comments, or concerns, then break up into groups to work on the discussion worksheet. Note that the worksheets are provided for you on Professor Smith’s class webpage. You must print out the worksheet beforehand and bring it to the recitation. It also wouldn’t hurt to glance over the problems ahead of time. Each group will be responsible for writing up solutions to a portion of the worksheet ranging from a part of a problem to multiple problems. There will be one selected problem from the worksheet for which all students are expected to turn in their own written solution. If we happen to have a quiz, then this will be done at the beginning of class (so don’t be late!).

Grading: This recitation section will account for 75 points out of the possible 500 points of this course. This is 15% of your final grade.

The 75 points will be distributed as follows:

Discussion Worksheet: 60 points (6 pts/ws best 10 worksheets)
  • Printing worksheet and turning it in at the end of class (1pt)
  • Group problem (3 pts)
  • Individual Problem (2pts)

Pop Quizzes: 15 points (5 pts/quiz x 3 quizzes)
The quizzes will be unannounced and will consist of one or two problems similar to previously seen problems in discussion worksheets.
