Please include the following in your reflection paper:

1. State the date of your visit and grade level of the class.
2. What big mathematical idea, do you believe, was the basis for the lesson? Why do you believe this?
3. Describe the activities you observed and the roles of the teacher and students in those activities.
4. What impact does/might your observation have on your Math 112 experience?
5. What did you find most interesting about the visit?
